Easy Banner Pro

http://www.phpwebscripts.com/easybannerpro/

Banner exchange and management system

Support for these formats: gif, jpg, png, swf (Flash) Real time statistics Admin set up banner dimensions Admin set up exchange ratio Unlimited number of categories Each member may have up to 3 accounts with different banner sizes, support for 3 banners in each of these 3 accounts (every member may have max of 9 banners) Members can get bonus impressions for click on their pages, so they are concerned to add the banner exchange code to a prominent place Each member may have individual exchange ratio and individual number of extra credits for each click Each member can select all or up to 5 individual categories of banners which should be displayed on his/her pages Advanced anti-cheat protection - the script checks IP of each impression and counts only one impression from each IP per day. This feature may be enabled/disabled by admin. Admin can select US/European time format If your server time and local time are differential, the time may be automatically converted to the local time Members can stop showing their banners to save impressions for more intensive campaign. This feature may be enabled/disabled by admin. Alt tag on banners is supported Admin can select if all links will be opened in a new or in the same window Automatic email to new members Automatic email to admin when new member signs up Automatic email to admin when an account is changed All new members must be approved by admin Ability to send email all members Possibility to keep banners on members servers or download it to the banner exchange server All public and members pages may be edited in any html editor, also all error messages may be edited Admin can add free impressions to any account Admin can take impressions from any account Ability to sell credits New members can automatically get free credits Members can automatically get free credits for referring new members Banner exchange button on the left or below all member's banners (admin select) Admin can see members with very low click ratio (it usually indicates cheating) Admin password and username can be easily changed from the admin interface Ability to install the script more than once and use the same database (titles of your tables may be changed) Easy installation - you only need complete a few fields in the setup form (as your email, name and password to database etc.) and the script do the rest Database backup/restore functions Password/username reminder The lowest prices on the market 1 year free updates, you may download the newest version from our site
