Banner exchange system

Easy Banner is a PHP script for running your own banner exchange system. Members of the banner exchange show banners on their sites and in return their own banner is displayed across the banner exchange. You, as the owner of the banner exchange take part of the banner impressions (you can choose the part, usually 30-50%) for promotion your own site or for sale. There are two versions of Easy Banner available - Free and Lite. Both these versions have the same features but the Free version has link to PHPWebScripts.com on each public page.
