Advanced text exchange system

Text exchange pro is a php script for running your own text link exchange system. members of the text exchange show links of other members on their pages and in return their own links are displayed across the exchange network. you, as the owner of the exchange system take part of the impressions (you can choose the part, usually 30-50%) for promotion your own site or for sale. text exchange pro is written in php and uses mysql database. it means that the script is fast and can be used for large traffic exchanges. it has lots of advanced features, for example templates (all pages are editable in any html editor), real time statistic and many more.
